

**multiTEMPTED subject loadings**

**MEFISTO subject factors**

## iPOP: multiTEMPTEd vs MEFISTO (log output)

Feature-loading agreement (best |cor| between the methods' loadings):

|                  | cytokine | metabolome | lipid | protein |
|------------------|----------|------------|-------|---------|
| multiTEMPTEd_PC1 | 0.20     | 0.14       | 0.20  | 0.16    |
| multiTEMPTEd_PC2 | 0.34     | 0.16       | 0.04  | 0.37    |
| multiTEMPTEd_PC3 | 0.33     | 0.10       | 0.27  | 0.12    |

Subject-embedding agreement (best |cor| of each multiTEMPTEd score with a MEFISTO factor):

|  | PC1  | PC2  | PC3  |
|--|------|------|------|
|  | 0.36 | 0.28 | 0.26 |

Sex association |cor(score, sex)| per component (max = best sex-separating axis):

|               |          |          |          |            |
|---------------|----------|----------|----------|------------|
| multiTEMPTEd: | PC1=0.53 | PC2=0.30 | PC3=0.11 | (max 0.53) |
| MEFISTO:      | F1=0.03  | F2=0.16  | F3=0.12  | (max 0.16) |
